Return reason/fault description:

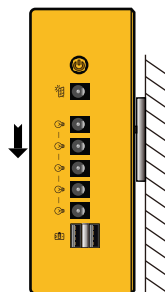

06 / Control Box Installation: _____

⚠ Please bring your own electric installation tools and wear work gloves during operation.

1

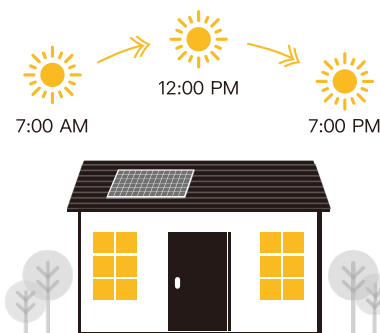

Take out control box bracket plate and matching screws. At proper wall height, fasten screws to plate holes with a screwdriver.

2

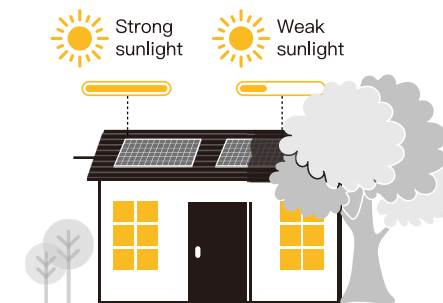

Snap the controller box down onto the mounting bracket to complete the installation.

07 / Solar Panel Installation: _____

Tips:

Install solar panels in a location with full sun exposure and keep them clean.

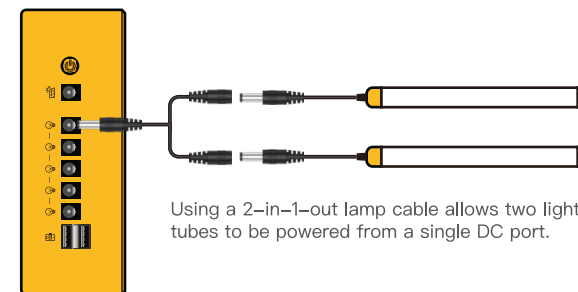

Tips:

Avoid shadows from blocking the panels to ensure efficient charging.

08 / Connect Tube Lights: _____

Connect the lamp cable to the control box. Suspend the lamp from the ceiling, then turn on both the power switch and the lamp cable switch. The lamp will operate normally.

Using a 2-in-1-out lamp cable allows two light tubes to be powered from a single DC port.

09 / Safety Information: _____

Do not disassemble the product. For repairs, please contact after-sales service.

Never expose the products to high temperatures or fire.

Keep solar panel clean for best performance.

Ensure control box unit with battery are fully charged before long-term storage.
